(408) 940 6484 | Bay Area, CA

EDUCATION

University of California, Davis *Expected 2024*
B.S. Computer Science, B.A. Design *GPA: 4.00*
Relevant Coursework: Programming in C, Object-Oriented Programming (C++), Linear Algebra, Introduction to Design

De Anza Community College *2018-2020*
Relevant Coursework: Beginning Programming Methodologies in C++, Discrete Mathematics, Multivariable Calculus *GPA: 3.89*

Cupertino High School *2016-2020*
GPA: 3.93
Relevant Coursework: AP Computer Science, AP Microeconomics, Pre-Calculus Honors
Activities: Interact (President), Tino-Crew Leadership, NHS, Varsity Volleyball, Varsity Swimming

EXPERIENCE

SWE Intern • **NASA Ames Research Center** *Palo Alto, CA • Summer 2019*
• Created an algorithm to decode and encode real-time ADS-B messages using Python
• Translated binary code, and performed necessary calculations to identify aircraft's address, position, velocity, etc.
• Analyzed data of a given CSV file to graph the trajectory of real-time flights using MATLAB

GWC Immersion Program • **Ford Motor Co.** *Mountain View, CA • Summer 2018*
• 7-Wk Immersion Program that covered Python, Robotics, Web Development, Data Visualization and Analytics
• Designed a website (private) where people could locate their lost pets using HTML, JavaScript, and CSS

PERSONAL PROJECTS

AI Program to Detect Changes in Retinal Images *August 2019*
• Detects changes in cholesterol, and early stages of diabetes in retinal images based on provided image

AI-Powered Voicebot to Improve Post-Operative Recovery *March 2019*
• Created an Amazon Alexa voice bot that conducts post-operative patient interviews and provides suitable feedback to improve patient recovery

Tech Challenge • Drop & Dash *April 2018*
• Awarded Outstanding Engineering Process
• Successfully constructed a device that survived a 10-foot drop and delivered a penny up a ramp to a specific location (without batteries)

SKILLS

Languages
Proficient: Java, Python
Familiar: C++, HTML, CSS,

Tools
Familiar: Adobe InDesign, Figma
